Ghost Rescuers

On a Sunday morning, very warm and sunny day, but in this house in Long Beach, California the temperature inside is very cold, in this case that means the house is haunted.

We were contacted by this family because they needed our help.

Present from the group are Chad Patterson, Don Neudecker, Virginia Neudecker, Nancy Richling, Liliana Aragon, Jose Marco, Alma Engelsman, Virginia Marco.

The owner of the house are very nice people, full of life, and greeted us with warmth arms.

While Chad was talking with the owners and the group was preparing their equipment, I decided to go outside and walk around the property, immediately, two male spirits started talking to me, the male spirits were telling me their names, Roger Mathew and Henry Donovan. Then, I saw a vortex coming from inside the house through the roof of the house, it was a broken vortex, almost open but not quit, that means that a long time ago somebody tried to open a vortex using some kind of vehicle like a Ouija board etc...but was unsuccessful.

I proceeded to go inside the house; I saw both spirits following the group around, the male spirit name Henry was the most aggressive, he had an awful laughter almost evil, the other male spirit name Roger was more sinister, both male spirits were malicious.

The male spirit name Henry was in his fifty, around 5'9 feet tall, he was wearing a white t-shirt with jeans roll up a little. The other male spirit was dressed with a dark shirt and also wearing jeans, he was around 6'0 feet tall, both male spirits had muscular built bodies.
